

SignWriting Location Symbols

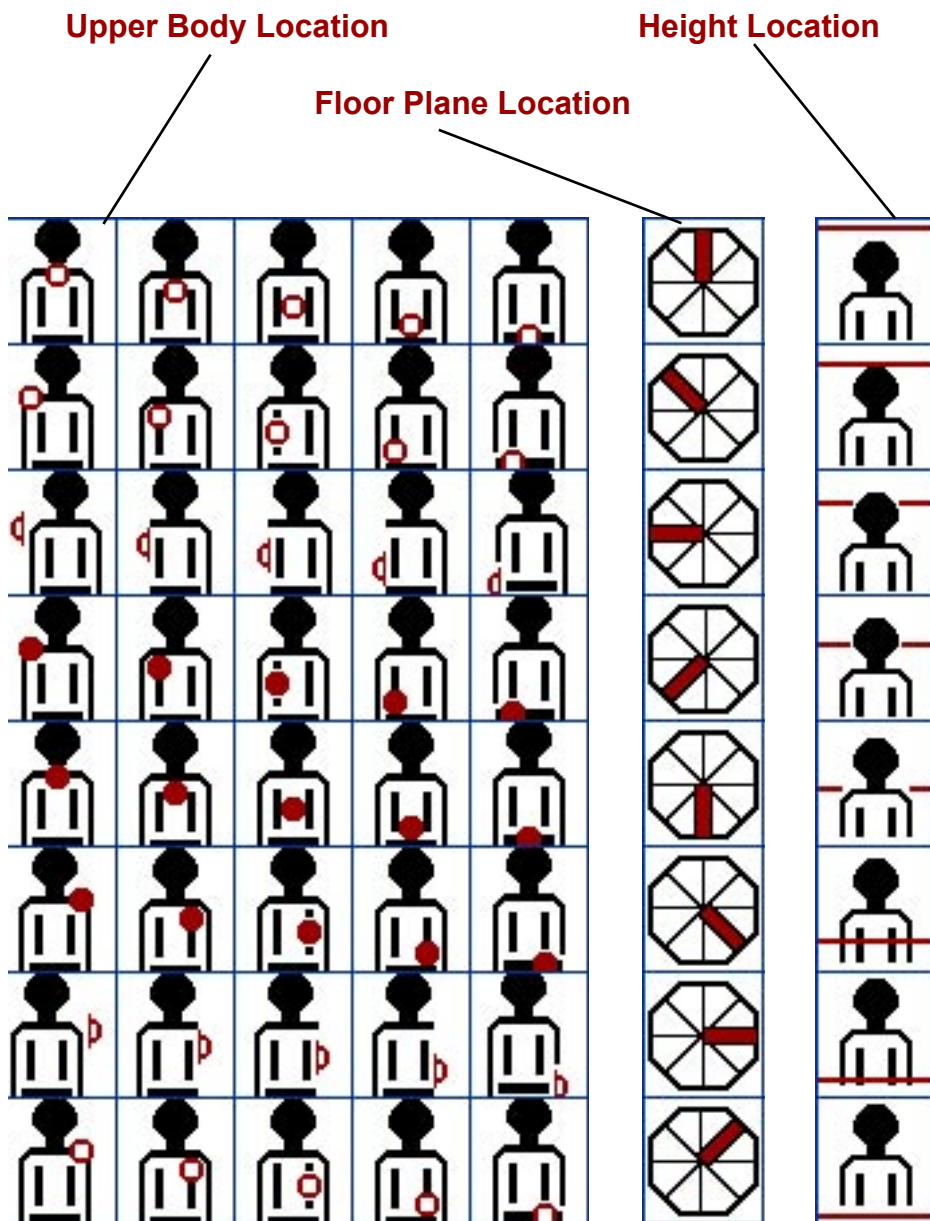

used in SignBank For Research Use, in the SSS-2004

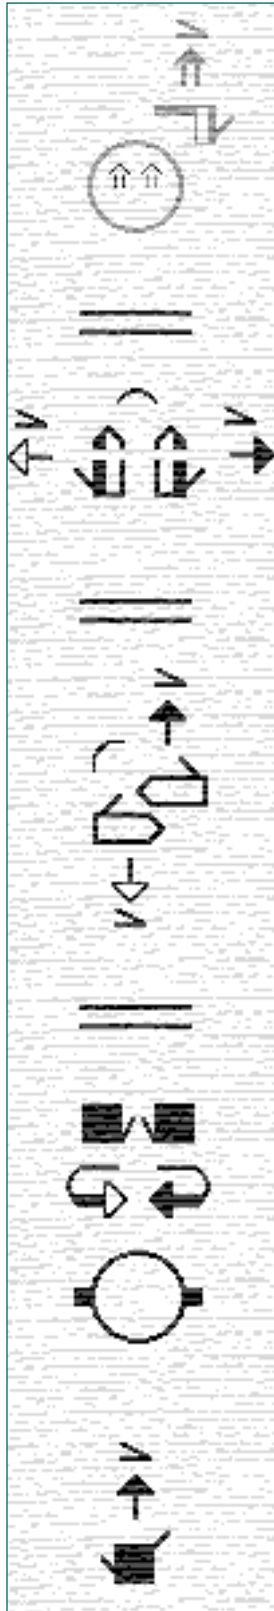

Sorting By Location Symbols

SignWriting can be sorted by detailed Location Symbols that are not actually written in the signs themselves. The markers show precise location of contact on the body, or precise location in space.

Some Location Symbols in SignBank for Research Use

1

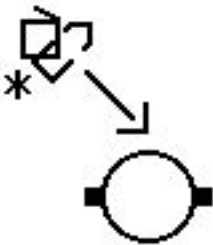

Height, Width
Depth Location

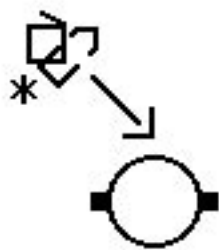

Height-Width-Depth Location

Height, width and depth can be marked in SignSpellings, by placing the Location Symbols for each Syllable, at the end of each Syllable.

Syllables are the beginning, middle and ends of a sign. All of the symbols inside one Syllable are done at the same time. So the Location Symbols are marking that syllables' position in space.

In the diagram on the next page, height, width and depth are marked with three combined symbols. In the diagram below, depth is marked with Floor Plane Location Symbols. Height-Width-Depth Symbols are listed at the end of this section.

	 1	SignSpelling Syllable 1 Beginning Position & Location
help (10) (v) He/she helps me.	 2	
Movement Description He or she (located in front of me in the far left corner) helps me (the movement comes back to me, toward my chest).	* 3	
	 4	
	 5	Syllable 2 Movement & Location At End Of Movement
 6		

help (09) (v) He/she helps me.

Movement Description

He or she (located in front of me in the far left corner)

helps me (the movement comes back to me, toward my chest).
