Dedication

Stephen E. Slevinski Jr. is a remarkable software designer. I knew that my task of creating the SignWriting symbols in my computer would be daunting, but Steve made it possible for me to test the symbols of the International SignWriting Alphabet (ISWA 2008) during the development process. Without Steve's fabulous software, SignPuddle, which is our world standard for writing SignWriting dictionaries and literature, SignWriting would not have the library of written literature it has today, written by signwriters in some 40 countries directly on the web. And without Steve's patient, creative and supportive hard work, it would have been very much harder for me to complete this enormous job. Steve not only built special testing software just for ISWA development, to review the symbols, but he also gave me excellent feedback on the symbol organization, coordinating my new improvements with his new software. In short, we make an excellent team, a true partnership. I design the symbols, with the welcome help and influence from signwriters all over the world, and Steve then builds the software needed to fit with the symbols we design. The result of our "Slevinski-Sutton collaboration" will give us all tools for publishing SignWriting Literature for years to come.

So I dedicate the International SignWriting Alphabet (ISWA 2008) to Steve Slevinski. Thank you, Steve, for the magical software you provide for all SignWriting users, and for your ever-present technical support, which we all depend upon daily.

Sutton Movement Writing

Sutton Movement Writing is the International Movement Writing Alphabet (IMWA). It is used to record all human and animal gesture. The IMWA can be compared to the International Phonetic Alphabet (the IPA) for spoken languages. The IPA records the details of sound-based-languages. The IMWA records the details of movement-based-languages. Since it is such a large and broad-based writing system, Sutton Movement Writing has been specified for five fields: **SignWriting**, for writing the movements of Sign Languages, **DanceWriting**, for writing dance choreography, **MimeWriting**, for writing classic pantomime, **SportsWriting**, for writing ice skating and gymnastics routines, and **MovementWriting**, for gesture-based research.

Sutton SignWriting

SignWriting is the most-used section of Sutton Movement Writing. With thousands of writers in over 40 countries, SignWriting is becoming the written form for Sign Languages. **The International SignWriting Alphabet**, the ISWA2008, includes all symbols used to write the handshapes, movements, facial expressions, and body gestures of any Sign Language in the world.

Open Font License (OFL)

Symbols in the Sutton Movement Writing system, including the **International SignWriting Alphabet (ISWA)** are free to use under the SIL Open Font License (OFL). See next pages...

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

SignWriting Software

SignWriting has been my life's work, since I wrote the first SignWriting document in Copenhagen, Denmark in 1974. I knew at the time, that there was no doubt, that SignWriting would be used around the world to write any sign language in any country, because the writing system is based on writing body movement. It does not stand in judgement of how people sign, but instead writes what we see. We write "pronunciation" of signs. The SignWriting Alphabet can be used to write any sign language in the world, because signers in each country can learn the symbols and apply the writing system to the sign language they know.

Since the personal computer had not been developed yet, back in 1974 when I first wrote SignWriting by hand, I could not foresee HOW we would someday create the needed "printing press" for mass-producing published SignWriting Literature, but I knew that it was needed, and that it would happen someday.

Since 1974, we have worked towards that goal. There have been two software developers who have had profound influence on my development of SignWriting: Richard Gleaves, who developed (1986-1996) the SignWriter Computer Program for Apple//e, Apple//c and MS-DOS, which was the first true "typewriter with keyboard entry" of SignWriting symbols:

SignWriter DOS

www.SignWriting.org/forums/software/sw44

...and Steve Slevinski, who developed (2004-present) SignPuddle Software, Binary SignWriting (BSW), the SignWriting Spatial AI-

phabet Font (SAF) and the 2008 SignWriting Image Server (SWIS):

SignPuddle Online

<http://www.signbank.org/signpuddle>

SignWriting Image Server (SWIS)

<http://www.signbank.org/swis>

From 1996-2004, in the time between the development of the SignWriter Computer Program, and the development of SignPuddle, I worked closely with Filemaker programmer Todd Duell, from Formulations Pro, to develop a way to sort dictionaries by the symbols of SignWriting. Todd and I took the idea of an old program I had developed in the 1980's with programmer Michael Ogawa, called **SignBank**. In the 1980's SignBank included two small Macintosh Desk Accessories: **SignBank I** sorted dictionaries by English alphabetical order, and **SignBank II** sorted dictionaries by SignWriting alphabetic order, which we called "the Sign-Symbol-Sequence®".

The Sign-Symbol-Sequence term developed because most signers think of "alphabetical order" to mean the English alphabet. It never occurred to most signers, that their native signed languages could now be written languages, and that the symbols used to write their handshapes, movements and facial expressions could be placed in a sequence, that then sorted dictionaries by handshape, movement and facial expression. The concept that Deaf children could learn to "look-up" signs in a dictionary based on which handshape was used first or second in a sign was a totally new concept.

The result of my work with Todd Duell was profound for future software developers. The new SignBank Database Software built inside FileMaker Pro, gave us the experience we needed to learn how

to publish large sign language dictionaries sorted by Sign-Symbol-Sequence. We learned that we needed more than the Sign-Symbol-Sequence. We also needed "SignSpelling Sequence" data that the computer could recognize. Later, Steve Slevinski built into SignPuddle Software a special "SignSpelling Sequence data" area for users, and SignPuddle can now export signs and import them into SignBank, for publishing large SignWriting multi-lingual dictionaries.

SignBank Database Software is available free for download on the web, and includes SymbolBank, a database that stores all symbols of the International SignWriting Alphabet (ISWA 2008). There is also a web-version of Sutton's SymbolBank:

Download SignBank

<http://www.SignBank.org/signbank.html>

SymbolBank on the Web

<http://www.MovementWriting.org/symbolbank>

I would also like to thank and acknowledge other programmers who have contributed to SignWriting history, such as Dr. Antonio Carlos da Rocha Costa from Brazil, who developed the first version of **SWML (SignWriting Markup Language)** and his computer science students, who developed their own SignWriting software, including a SignWriting program that has potential: **SW-Edit**, by Rafael Piccin Torchelsen. Brazil produced several web-based programs for SignWriting including **Sign WebMessage** by Vinícius Costa de Souza and **DicionarioLibras** by Pedro Augusto Marques.

Find the above programs in the

SignWriting Software Forum:

<http://www.signwriting.org/forums/software/>

The **Flemish Sign Language Online Dictionary** (WoordenBoek), was produced by developers Bart Braem & Stephen Aerts. Visitors to their web site: <http://gebaren.ugent.be> can search by spoken language or SignWriting symbols to find signs written in SignWriting side by side with videos of signs, including multiple dialects.

And thanks also to programmers who started important SignWriting software projects, and because of lack of funds could not complete them, such as the SignWriter Java project by DTAI software, SignWriter Tiger by Daniel Noelpp, SignWriter Python by Lars Majewski, and SignWriting in Unicode by Michael Everson. There are also SignWriting TrueType fonts developed by Michael Everson, Steve and Dianne Parkhurst, and Stefan Woehrmann. All of your efforts are truly appreciated!

ISWA 2008

International SignWriting Alphabet 2008

SignWriter, our first "typing program", back in 1986, was designed for the first personal computers developed by Apple, the Apple //e and //c. Designer and programmer Richard Gleaves created a little in-house "Symbol Editor" program just for the two of us, so we could share the job of entering all of the SignWriting symbols into the computer. In the beginning, to get the programming work started, Rich did a good majority of the symbol entry, but once he taught me how to use the Symbol Editor, I took over the important and exciting work of entering the symbols, one by one in bitmapped format. It was not uncomplicated work. Rich developed a way that we would only have to enter four out of 16 possible flops and rotations of each symbol, and his programming of SignWriter code would then do all the flops and rotations internally. I then designed the SignWriter keyboards. I decided where to place the symbols on which keys, and then Rich programmed it so when we typed a key, up would appear a screen with choices for more symbols that were available in a layer underneath the first key. The SignWriter Computer Program typing method is used to this day in the old SignWriter DOS program. It became the standard that we based future coding of SignWriting symbols upon.

The symbols in Rich Gleaves' Symbol Editor had an ID number like this: 001-01-01-01, which represented the symbol number, the variation, the fill and the rotation for each symbol. Later, in SignBank development, we added two more numbers in the front like this: 01-01-001-01-01-01, for Category and Group numbers. To this day, the old Gleaves ID numbering system is used when categorizing the International SignWriting Alphabet, 2008.

Steve Slevinski has now provided us with modern database software that is web-based. Search for symbols online, not only by the old ID numbers, but also by Slevinski's new BaseSymbol number, Character Code number and Hexideciamal number.

ISWA Online Database

<http://www.signbank.org/swis/data.php>

Developing the ISWA 2008 has been a labor of love for me. I have worked on this new set of symbols, in bitmapped PNG format, for several years now. The International SignWriting Alphabet is an improvement over the 2004 International Movement Writing Alphabet (IMWA 2004). The old IMWA included symbols that were not used in SignWriting, such as symbols for writing sports (skateboarding), and symbols for writing anthropological studies (the writing of movements of the arms while holding an axe and cutting trees for carving Norwegian viking boats). Yes...those were real projects that were written in Sutton Movement Writing...but they were not symbols that were relevant to writing the Sign Languages of the world!

So the International SignWriting Alphabet 2008 includes only those symbols needed to write Sign Languages, including some new handshapes for writing Ethiopian Sign Language, and improved Movement Symbols and Facial Expressions needed for writing Sign Language storytelling. Symbols needed for advanced sorting routines in dictionaries were moved to the back of the ISWA, since they are not needed for daily writing. This meant a large re-numbering of all symbols. I also collapsed 50 groups of symbols into 30 groups, making it easier to use.

Valerie Sutton

7 Symbol Categories

...Category Names & Descriptions...

1

Category 1 Hands

About Category 1

Handshapes from over 40 Sign Languages are placed in 10 groups based on the numbers 1-10 in American Sign Language. For example, all of the hands that have a single index finger extended, are located under Group 01: Index.

Category 1: Hands

- Group 01: Index
- Group 02: Index Middle
- Group 03: Index Middle Thumb
- Group 04: 4 Fingers
- Group 05: 5 Fingers
- Group 06: Baby Finger
- Group 07: Ring Finger
- Group 08: Middle Finger
- Group 09: Index Thumb
- Group 10: Thumb

2

Category 2 Movement

About Category 2

Contact symbols, small finger movements, straight arrows, curved arrows and circles are placed into 10 groups based on planes: The Front Wall Plane includes movement that is “parallel to the front wall” and the Floor Plane includes movement that is “parallel to the floor”.

Category 2: Movement

- Group 11: Contact
- Group 12: Finger Movement
- Group 13: Straight Wall Plane
- Group 14: Straight Diagonal Plane
- Group 15: Straight Floor Plane
- Group 16: Curves Wall Plane
- Group 17: Curves Hit Wall Plane
- Group 18: Curves Hit Floor Plane
- Group 19: Curves Floor Plane
- Group 20: Circles

3

Category 3 Face Head

About Category 3

Starting from the top of the face and moving down, Groups 21-24 include detailed facial expressions and movement of parts of the face and neck. Group 25 includes head movement and views of the head.

Category 3: Faces & Head

Group 21: Brow, Eyes, Eyegaze

Group 22: Cheeks Ears Nose Breath

Group 23: Mouth Lips

Group 24: Tongue Teeth Chin Neck

Group 25: Head

4

Category 4 Body

About Category 4

Torso movement, shoulders, hips, and the limbs are used in Sign Languages as a part of grammar, especially when describing conversations between people, called Role Shifting, or making spatial comparisons between items on the left and items on the right. The symbols of the body that are in Category 4 are important when writing sign language storytelling and poetry. All sign languages have some signs that point below the hips, or touch the torso, or hunch the shoulders, or touch the arms and wrists.

5

Category 5

Dynamics & Timing

About Category 5

Dynamics Symbols are used mostly with Movement Symbols and Punctuation Symbols, to give the “feeling” or “tempo” to movement. They also provide emphasis on a movement or expression, and combined with Punctuation Symbols become the equivalent to Exclamation Points. The Tension Symbol, combined with Contact Symbols, provides the feeling of “pressure”, and combined with facial expressions can place emphasis or added feeling to an expression. Timing symbols are used to show alternating or simultaneous movement.

6

Category 6

Punctuation

About Category 6

Punctuation Symbols are used when writing complete sentences or documents in SignWriting. The Punctuation Symbols do not look like the symbols for punctuation in English, but they do have similar meanings. SignWriting punctuation symbols include a period, comma, colon, semi-colon, exclamation point and so forth.

7

Category 7

Advanced Sorting

About Category 7

The symbols in Category 7 are detailed Location Markers that are not used when writing signs on a daily basis. Location is written and read in SignWriting **WITHOUT** these symbols.

The symbols in Category 7 are only used in computer software to assist in giving further details for sorting large sign language dictionaries that are sorted by SignWriting symbols. Sometimes signs that are slightly different, may have similar SignSpelling data, and the symbols in Category 7 can help decide which sign should come first and which should come second, in the dictionary.

Category 1: Hands
